

HULK Earth Anchors

UNDERGROUND TREE ANCHOR KITS

Hulk Earth Anchors offer the perfect solution for anchoring trees where guy systems or unsightly stakes are not desired or possible.

With our Hulk Earth Anchor Underground Tree Kits you are able to offer safe and cost effective tree anchoring which is ideal for plantings in parks, playgrounds, along footpaths and walkways. The Hulk Earth Anchor Underground Tree Kit is a professional, completely underground tree anchoring solution, suitable for securing newly planted trees of all sizes in most situations.

- Only the planted tree protrudes above ground level.
- No unsightly guys or stakes.
- No trip hazards near planted trees.
- Fast and easy installation.
- Ideal for footpath, park and playground plantings.

HULK UNDERGROUND TREE KITS INSTALLATION

Hulk Earth Anchors are installed at the bottom of the planting hole where the tree root ball is going to be placed. The anchors are installed in a triangular pattern by driving them into the ground with a re-usable Hulk Smasher Rod. This driving process can be done with a hand held hammer or commercially available powered hammering equipment. The hammering process would generally be determined by the size of the anchor, ground conditions and the total quantity of Hulk tree anchoring kits which need to be installed.

TOP VIEW OF AN ANCHORED TREE:

The Hulk Earth Anchor is driven into the ground to a depth where only the D-Ring is left exposed, after which the Hulk Smasher rod is removed and the anchor is set in the ground with an upward pull on the anchor tendon. After placing the tree in the planting hole, the Hulk tensioning strap is passed through each of the anchors D-Rings and wrapped over the root ball in a triangular pattern. The strap is then tightened with the ratchet tensioner firmly anchoring the tree into position leaving only the tree above ground level.

HULK UNDERGROUND TREE KITS:

| Kit Model | Tree Size | Kit Contents | Kits per Case | Weight per case |
|-----------|---|---|---------------|-----------------|
| HP25UTK | For small trees up to 75mm diameter | 3 X HULK HP25 Earth Anchors with fitted D-rings 1 X 2.5m green tensioning strap with ratchet | 15 | 6kg |
| HP35UTK | For trees 75mm to 150mm diameter | 3 X HULK HP35 Earth Anchors with fitted D-rings 1 X 5.5m blue tensioning strap with ratchet | 6 | 15.5kg |
| H50UTK | For trees 150mm to 350mm diameter in hard soil | 3 X HULK H50 Earth Anchors with fitted D-rings 1 X 6.5m red tensioning strap with ratchet | 3 | 12.5kg |
| H80UTK | For trees 150mm to 350mm diameter in medium hard soil | 3 X HULK H80 Earth Anchors with fitted D-rings 1 X 6.5m red tensioning strap with ratchet | 3 | 14kg |
| H110UTK | For trees 150mm to 350mm diameter in soft soil | 3 X HULK H110 Earth Anchors with fitted D-rings 1 X 6.5m red tensioning strap with ratchet | 3 | 16.5kg |

One kit anchors one tree. Hulk Smasher drive rod additional. Installation instructions included.
